About Me:

- **Business-oriented Frontend / Full-Stack Developer** with **20+ years of experience in IT** and strong expertise in **modern web application development**. Over the last several years, I have focused on **React, Next.js, TypeScript, HTML, CSS** and the broader **JavaScript ecosystem**, combining solid engineering foundations with up-to-date frontend and backend technologies.
- I have experience building **complex web solutions**, working across **architecture, implementation, integrations** and product-oriented development. I value clean code, **practical problem-solving** and close alignment between technology and business goals.
- Recommendations: [LinkedIn](#)
